SUMMARY

I started as an intern at the Municipal Government of Campo Grande, where I renewed my six-month contract four times. I assisted Environmental Inspectors, preparing reports and analyses for Preliminary Licenses (LP), Installation Licenses (LI), and Operation Licenses (LO). After completing this internship, I joined FUNASA - National Health Foundation in the engineering sector, analyzing municipal basic sanitation plans for cities in Mato Grosso do Sul.

After completing my degree, I worked as a freelance engineer, gaining experience in various environmental program studies.

Currently, I am dedicated to Software Development, a field that brings me great fulfillment, working on something I truly enjoy and that continually challenges me to improve.

EDUCATION

- Postgraduate in Software Engineering
 - Universidade Católica Dom Bosco - Completed: 10/2022
- Postgraduate in Occupational Safety Engineering
 - UNIDERP Anhanguera - Completed: 2019
- Bachelor's Degree in Sanitary and Environmental Engineering
 - Universidade Católica Dom Bosco - Completed: 2016

COURSES

- Software Factory - SENAC - 2022
- Systems Architecture Cloud Computing - SENAC MS (30 hours) - 2022
- DP-900: Microsoft Azure Data Fundamentals - 2024
- AI-900: Microsoft Certified: Azure AI Fundamentals - 2024
- Cybersecurity Essentials - Cisco Networking Academy - 2021
- jQuery: Advance in the Most Popular Market Library Parts 1 and 2 - 2022
- API RESTful with Azure - Udemy - 2025
- Intermediate Office Package

LANGUAGES

- Advanced English - Wizard (2011 - 2015)

PROFESSIONAL EXPERIENCE

INFORTECH MS

Mid-Level Software Developer

- Maintenance and updates of the Planning and Finance System of Mato Grosso do Sul state.
- Front-End and Back-End development.
- SQL Server script development.
- Report development using Jasper and Report Builder tools.

INDEPENDENT CONSULTANT

Freelance Engineer

- Environmental licensing for obtaining and renewing environmental licenses (LP, LI, LO) for companies from various sectors.
- Monitoring and follow-up of environmental license conditions.
- Noise analysis.
- Environmental reports (noise, septic tanks, oil-water separators, among others).
- Development of environmental studies and programs (ECA, RAP, PGR, PAE, among others).
- RESULTS: From 2016 to 2019, carried out several environmental projects in partnership with Master Engenharia Soluções Ambientais.

FUNASA - NATIONAL HEALTH FOUNDATION

Engineering Intern

- Intern in the engineering sector, analyzing municipal basic sanitation plans for various cities in Mato Grosso do Sul.

MUNICIPAL GOVERNMENT OF CAMPO GRANDE

Engineering Intern

- Intern in the Division of Environmental Inspection and Licensing.
- Performed analysis for LP, LI, and LO, and organized documents.
- RESULTS: Conducted a study for my graduation thesis (TCC) on contaminated areas by gas stations in Campo Grande, used by the Public Prosecutor's Office for reviewing gas stations under Conduct Adjustment Terms (TAC).

ADDITIONAL INFORMATION

- Category B Driver's License
- Willingness to travel
- Experience with Agile methodology (Scrum) and production flow control using Kanban
- Experience with .Net C#, ASP.NET Core, MVC, HTML, RAZOR, JavaScript, JSON, jQuery, LINQ, Entity Framework, Web API Rest and Restful, Angular, and ReactJS
- Experience with SQL Server, Oracle, and MySQL
